

## Case Study: Custom Solutions

### Securing odd-sized shelving spaces

**Client:** A University of Health and Science

### Situation A:

- Secure large shelving areas for merchandise in the book store

### Solution:

- With a center bracket kit, Rollok is able to secure continuous runs of any width
- Had this unit been motorized, a single push of a remote would operate both doors simultaneously

### Situation B:

- Seal off a corner shelving unit of an unusual size

### Solution:

- Difficult corner units were sealed off with ease, where traditional swinging doors would not have worked
- Even an odd-shaped shelving unit can be equipped with a Rollok door

**Quote:** "The ultimate solution for the security of our merchandise. Surprisingly strong shutters to be so light-weight. They also look great when they are closed."

- Bookstore Administrator
