

Case Study: Durability & Longevity of Rollok Doors

Client: *University of Texas at Arlington*

Situation:

- Sensitive records and expensive equipment needed to be secured to meet federal regulations
- Open office space presented a problem when privacy was desired
- Required a long-lasting solution that could quickly be installed

Solution:

- Created a secure office space by sealing off a counter and an open walkway
- Rollok doors provided long-lasting security
- Motorized doors made operation simple

Quote:

" Rolling shutter doors were installed in our student advising area back in 1991 to provide the needed security for students' private records. With federal regulations requiring better security of personal records, the rolling shutters were a perfect solution. These shutters have worked flawlessly for 14 years."

Raymond Shoults, Ph.D.
